DELAYED ORDERS

EXECUTIVE SUMMARY

Shop-Nest recorded **16M in revenue across 99,000+ orders** over 2016–2018, with consistent year-on-year growth. Revenue grew from near-zero in 2016 to approximately **7.5M in 2017 and ~9M in 2018**. Q2 is consistently the strongest revenue quarter (~4.8M), while Q4 shows a sharp decline to ~3M — a seasonal pattern that demands attention. Of 99K orders, **7,827 (7.9%) experienced delivery delays**, concentrated in the top 6 product categories, pointing to specific supply chain and logistics gaps.

REVENUE PERFORMANCE

Year-on-Year Growth

Revenue grew from **~₹0.2M in 2016** (partial year — platform early-stage) to **~7.5M in 2017** and **~9M in 2018**. The steepest growth occurred in mid-2017, indicating successful market penetration during Year 2.

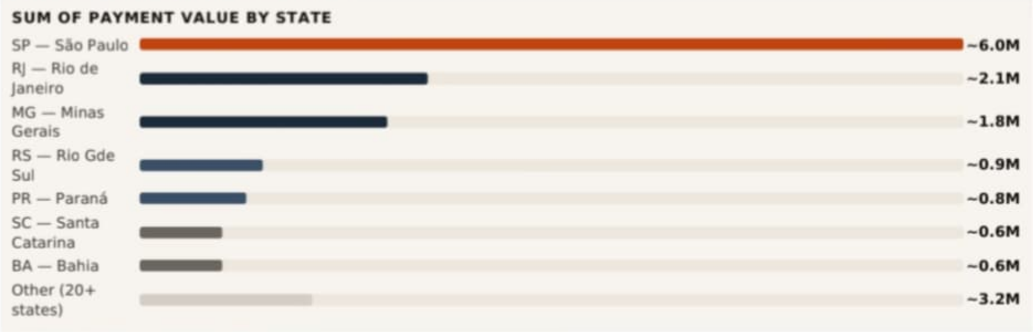
Seasonal Pattern — Critical Q4 Drop

Q2 peaks at **~4.8M** (Apr–Jun) — likely driven by mid-year promotions and holiday cycles. Revenue then declines steadily: Q3 ~4.1M → Q4 **~3M**. This 38% drop from peak to Q4 trough signals either stock-out issues, seasonal demand softening, or reduced marketing spend in H2.

State Concentration Risk

São Paulo (SP) contributes **~6M** — nearly 37% of total revenue. Rio de Janeiro (RJ) at ~2.1M and Minas Gerais (MG) at ~1.8M bring the top-3 total to **~62% of platform revenue.** Over 20 states contribute less than 1% each.

STATE-WISE REVENUE (TOP 8)



SEASONAL REVENUE INDEX

DELIVERY PERFORMANCE ANALYSIS

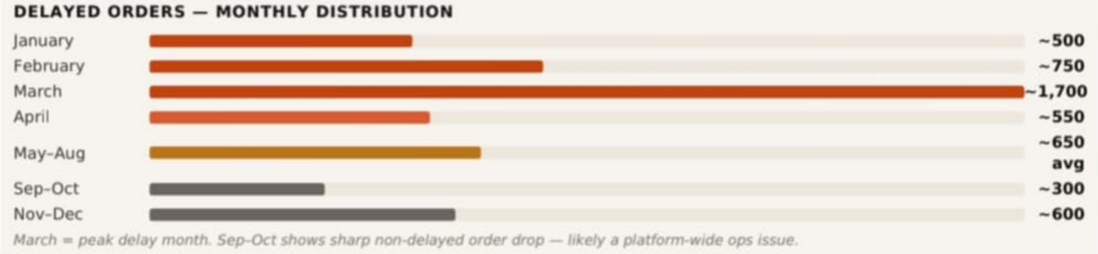
7,827 total delayed orders — representing **7.9% of all orders**. Delayed orders track consistently at 500–1,800/month from January to August, then spike in September before recovering. Non-delayed orders show a sharp drop in September (from ~10K to ~4K), indicating a **major operational disruption in Sep-Oct** that warrants root-cause investigation.

DELAYED ORDERS BY CATEGORY

#	Category	Delayed Orders	% of Total Delays
1	bed_bath_table	811	10.4%
2	health_beauty	**776**	9.9%
3	sports_leisure	**584**	7.5%
4	furniture_decor	**535**	6.8%
5	computers_accessories	**503**	6.4%
6	watches_gifts	**468**	6.0%
7	housewares	**399**	5.1%
8	telephony	**349**	4.5%
9	auto	**328**	4.2%
10	toys	**286**	3.7%
Top 6 subtotal		**3,677**	**47.0%**

Top 6 categories account for 47% of all delays. Focus ops here first.

MONTHLY DELAY PATTERN



Critical Operational Gap — September

Non-delayed order volume drops from **~10,000 in August to ~4,100 in September** — a 59% fall. This is not a delay problem; orders simply weren't fulfilled. Likely causes: warehouse capacity, carrier partner disruption, or platform downtime. Needs root-cause analysis.

PRODUCT PERFORMANCE & CUSTOMER RATINGS

TOP CATEGORIES BY ORDER VOLUME

Notably, bed_bath_table = highest orders AND highest delays — a combined volume + fulfilment risk.

PRODUCT RATINGS & PAYMENT PREFERENCES

Product Rating Analysis (Top 10 Products)

All top-10 rated products score between **3.9 and 4.3 out of 5**. The highest-rated product scores 4.3; the lowest of the top 10 scores 3.9. The tight range (only 0.4 spread) suggests broadly consistent quality — no single product dramatically outperforms or underperforms among the top-rated set.

PAYMENT METHOD DISTRIBUTION

Payment Insight

Boleto at 19% signals a **non-digital / underbanked customer segment**. This group may face friction with instalment options — a potential revenue lever if addressed through BNPL (Buy Now Pay Later) or offline banking integrations.

7,827 delayed · Top 6 categories = 47% of all delays

−38%
Q4 REVENUE DROP
From Q2 peak of ~4.8M to Q4 trough of ~3.0M

BUSINESS RECOMMENDATIONS

REC 01 · OPERATIONS — HIGH PRIORITY

Fix the September operational collapse

Non-delayed order volume crashed 59% in September (10K → 4.1K). This is not a delay issue — orders weren't fulfilled at all. Conduct root-cause analysis: warehouse capacity limits, carrier partner SLA breach, or platform system issue. Build redundancy before the next equivalent period. This is the single highest-priority operational fix.

REC 02 · SUPPLY CHAIN — HIGH PRIORITY

Targeted delay reduction in top 3 categories

bed_bath_table (811), health_beauty (776), and sports_leisure (584) account for 27.8% of all delays despite being the top 3 order-volume categories. The combination of high volume + high delay rate creates compounding customer experience damage. Assign dedicated carrier SLAs, pre-position stock closer to SP/RJ/MG, and flag these SKUs for priority fulfilment queuing.

REC 03 · REVENUE — MEDIUM PRIORITY

Address the Q4 revenue decline with targeted campaigns

Q4 revenue of ~3M is 38% below the Q2 peak. Brazilian Q4 includes significant holidays — the platform should be a revenue driver, not a laggard. Launch early Black Friday inventory preparation, Q4-specific promotional bundles in bed_bath_table and health_beauty (top volume categories), and targeted campaigns in SP, RJ, and MG where spend is already established.

REC 04 · GEOGRAPHIC GROWTH — MEDIUM PRIORITY

Reduce geographic revenue concentration risk

SP alone = ~37% of revenue. Combined with RJ and MG, three states = 62% of platform GMV. Any logistics, regulatory, or economic disruption in these states has an outsized platform impact. Invest in seller recruitment and fulfilment infrastructure in RS, PR, and SC — the next-tier states already showing meaningful order volumes (~0.8–0.9M each).

REC 05 · PAYMENTS — LOW PRIORITY

Unlock revenue from the Boleto (19%) segment

19% of customers (19.78K transactions) use Boleto — an offline bank payment favoured by underbanked and lower-income segments. This group likely has lower average order values and higher abandonment rates. Introduce instalment payment options (parcelamento) and BNPL integrations to increase basket size for this cohort. Even a 10% basket uplift on 19.78K transactions = meaningful incremental revenue.

ACTION PRIORITY MATRIX

Priority	Area	Action	Expected Impact
High	Operations	Investigate Sep fulfilment collapse	Recover ~5.9K lost orders/year
High	Supply Chain	SLA fix for top 3 delayed categories	Reduce 2,171 delays (27.8% of total)
Medium	Revenue	Q4 campaign & inventory prep	Recover ~0.5–1M in Q4 revenue gap
Medium	Geography	RS/PR/SC seller & fulfilment push	Reduce single-state revenue dependency
Low	Payments	Boleto instalment / BNPL options	Basket size uplift for 19% of users
